## COMPETENCY CERTIFICATE

We take great pleasure in certifying that Safeco Arabia (Suliman Bryke Mohammed Al Gami Est.) is a professional and competent company, who can undertake multiple tasks such as Civil Construction of offices, villas, fabrication & erection works and other miscellaneous works on time frame agreed.

Vanderlande Industries has been dealing with Safeco Arabia from February 2009 in getting many projects completed in the Kingdom of Saudi Arabia and we found, they are extremely competent. To name a few, International Airport Jeddah, Najran Airport, Vanderlande office construction in Jeddah and various other works.

We truly recommend them for any type of works mentioned above to be executed precisely.

Any further reference can be given either from Vanderlande Corporate office, Veghel, The Netherland or from our local Jeddah office.

Thanks and Best Regards,

Wim Vos

Construction Manager
